

MUHAMMAD AZAM

Senior Mobile Application Developer • Flutter • Android • Kotlin & Dart

Lahore, Pakistan • azammohammad376@gmail.com • 0300-7810704

PROFESSIONAL SUMMARY

Mobile Application Developer with 6+ years of experience designing and building Android and Flutter applications for smartphones and tablets, including native Java- and Kotlin-based apps. Strong understanding of Android back-end architecture and UI guidelines, with hands-on expertise across SQLite, Firebase, RESTful APIs, Google Maps API, and GPS location data. Has shipped multiple apps live on the Google Play Store and App Store across productivity, utility, and B2B marketplace domains.

SKILLS & STRENGTHS

Languages & Frameworks: Kotlin, Java, Dart, Flutter, Android, XML

Architecture & State: Jetpack Compose, Koin, GetX, Provider, MVVM

Data & Networking: SQLite, Hive, RESTful APIs, Firebase, offline data storage

Tools & Other: Git, Google Maps API, GPS Location Data, AdMob, Push Notifications

WORK EXPERIENCE

Senior Mobile Application Developer | **Dream Edge Technology** • Multan, Pakistan

Jun 2025 – Present

- Working as a Senior Mobile Application Developer, leading development of Android and Flutter applications and taking ownership of feature architecture and delivery.

Flutter Developer | **Prosigns Technology** • Lahore, Pakistan

May 2023 – May 2025

- Delivered practical experience across diverse project types including construction, ITMIS, and Value Soft platforms, applying Firebase, GetX, Provider, offline data storage, AdMob, Hive, and push notifications.
- Built and shipped **Smart Printer**, a mobile printing assistant that lets users print directly from their phone to a connected printer. [Play Store](#)
- Built **Digital Weight Scale**, an all-in-one health utility app combining a Weight Monitor, Weight Checker, BMI Calculator, Unit Converter, Compass, and Date Calculator. [Play Store](#)
- Developed **Retwho**, a B2B platform connecting wholesalers and retailers for secure, transparent buying and selling of physical goods. [Android](#) | [iOS](#)

Android Developer | **Game Smack** • Lahore, Pakistan

Mar 2022 – Apr 2023

- Designed and developed Android applications from the ground up using Kotlin and Java, following the MVVM design pattern.
- Used Android Studio and Interface Builder for UI development, with daily Git-based version control and code pushes.
- Built **AppLocker**, a security app for hiding and locking apps, photos, and videos behind a vault. [Play Store](#)

PROJECTS

Cook and Ways

Tools: Android Studio, Flutter SDK, Dart

- Built a food delivery app integrating APIs to connect users with delivery riders, similar to Foodpanda.

Voice Changer & Recorder

- Audio recording and voice-modulation app for capturing and transforming voice clips on the go. [Play Store](#)

PDF Reader, Editor & Viewer

- Utility app for viewing, editing, and managing PDF documents directly from mobile devices. [Play Store](#)

Photo & Data Recovery

- Data recovery app that scans devices to restore accidentally deleted photos and files. [Play Store](#)

Antivirus Cleaner

- Security and device-cleaning app for scanning threats and clearing junk files to boost performance. [Play Store](#)
